

We are looking for the next possible date a

## Frontend Engineer (m/w/d) fulltime

We are a Berlin-based PropTech that offers investors and developers a web-based software to find real estates that fit their strategy, analyze the market and provide valuable insights. We are the only German provider to create a complete Real Estate Location Analytics system with all the necessary data - digitally on a single platform. Thanks to machine learning we generate the data basis from big data.

We strive for constant innovation using state of the art technology, to not only provide data but to analyze and learn from it, using Machine Learning and other Big Data technologies in order to create real value and a unique experience for our customers.

Our current products are built on a microservice architecture, based on React/Typescript frontend and the functional Scala/Rust backend.

### Your responsibilities

- You will design and implement cutting-edge frontend applications, integrations with REST APIs
- You will take responsibility in the architecture, design, implementation and the operation of the created web application
- You are an advocate and practitioner of modern software development methodologies such as continuous delivery, DevOps and Kanban

### Your profile

- You are experienced with React/Redux, Javascript and willing to learn Typescript
- You have a solid understanding of clean code principles, functional and design patterns
- You have solid HTML and CSS knowledge
- You are a team player and you're able to give as well as receive feedback
- You are curious to learn new things and you provide a creative outside-the-box problem solving
- Fluent in English is a must, German skills are a plus

### What we offer

- A family-friendly fully remote position for candidates in Germany, competitive compensation, flexible working hours
- Flat hierarchies, short and open communication flows and quick decision-making processes
- A great place to grow and to take over responsibility, professionally and personally
- A working environment that values individuals and embraces knowledge sharing
- A highly motivated and talented diverse team
